Join us for a high-level overview of the Climate Friendly Areas and Equitable Communities (CFEC) rulemaking related to Executive Order 20-04. We will overview the rulemaking in order to help the public understand the potential for code changes needed for compliance.

Background:

On March 10, 2020, Oregon State Governor Kate Brown issued Executive Order 20-04. The Order directs certain state agencies, including the Department of Land Conservation and Development (DLCD), to take action to move as quickly as possible to reduce climate pollution. The CFEC rulemaking is a project of the DLCD, through which the Department seeks to propose new administrative rules for cities to implement statewide.

What are these administrative rules?

The proposed CFEC rulemaking includes far-reaching proposed changes in the areas of denser housing, mixed-use development, limited auto-centered uses, parking, transportation planning and metropolitan greenhouse gas reduction targets applicable to the City of Bend. Attend and learn the basics, learn more about how this may affect future growth in Bend, and how you may take part in the process.
